This is a simple sample document. For more complicated documents, take a look in the exercise tab. Note that everything that comes after a % symbol in LaTeX is treated as a comment and ignored when the code is compiled.

Hello World!

Hello World! Today I am learning L^AT_EX. L^AT_EX is a great program for writing math. I can write in-line math such as $a^2 + b^2 = c^2$. I can also give equations their own space:

$$\gamma^2 + \theta^2 = \omega^2$$

If I do not leave any blank lines, L^AT_EX will continue this text without making it into a new paragraph.
